SUMMARY

Computer Science graduate and full-stack web developer with hands-on experience building responsive React applications, REST APIs, and third-party integrations, plus adding AI features like RAG and LLM-powered chat and agents. Comfortable across the stack, from frontend UI to backend services, with an eye for shipping production-ready products.

TECHNICAL SKILLS

Frontend	React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, State Management
Backend & APIs	Python, FastAPI, Node.js, Express.js, REST APIs, Server-Sent Events (SSE), MERN Stack
Generative AI / LLMs	LLM APIs (OpenAI, Gemini, Ollama), Prompt Engineering, RAG, Embeddings & Vector Search, Function/Tool Calling
AI Agents	Multi-Agent Systems, LangGraph, LangChain, Agent Memory, MCP
Tools & Platforms	Git/GitHub, ChromaDB, Ollama, Vector Search, Google AI Studio, Claude, Codex, Antigravity

TECHNICAL PROJECTS

Querywise — Local Retrieval-Augmented Generation (RAG) System

RAG, LangChain, ChromaDB, Ollama

github.com/veerverma828/Querywise

- Built a full-stack local RAG app (FastAPI backend, JS frontend) with 3 answering modes (RAG, tool-use, direct chat) and streaming responses across 8 REST endpoints, using local models with no external API calls.
- Implemented a 2-stage retrieval pipeline — vector search over 10 candidates re-ranked by a cross-encoder to the top 2 — plus ingestion for 3 document formats (.txt, .pdf, .docx) and incremental re-sync.

Media discovery & streaming platform

React.js · Node.js · Express.js

torrent-gamma.vercel.app

- Full-stack MERN platform for movie and series discovery.
- Chains 4 external APIs — Cinemeta (metadata/posters), Torrentio (streaming sources), Jackett (torrent search with seeders/size), and Real-Debrid (download/unrestriction) — behind an Express backend.
- Features season-to-episode navigation, IMDb direct search, and debounced auto-search in a state-driven React UI.

Aggrify — Real-Time Grocery Price Comparison Engine

React, Express, Playwright, Gemini

github.com/veerverma828/Aggrify

- Aggregates live grocery prices across 5 quick-commerce platforms (Blinkit, Zepto, Instamart, JioMart, and Flipkart) using concurrent Playwright scrapers coordinated through a multi-agent blackboard architecture, streaming results to the React UI via Server-Sent Events.
- Includes a Gemini-powered shopping assistant for basket optimization, fake-discount detection (flags markdowns over 70% as suspicious), and trust scoring (alerts below an 80% reliability threshold).

NovaShare — Peer-to-Peer File Sharing Application

React, Capacitor, WebRTC, PeerJS

veerverma828.github.io/novashare

- Built a cross-platform P2P sharing app using React, Capacitor, WebRTC, and PeerJS.
- Ships 9 features: QR-based device pairing, multi-file/folder transfers, pause/resume, nearby discovery, Wi-Fi Direct, hotspot fallback, clipboard sharing, chat, and transfer history.

EDUCATION & CERTIFICATIONS

B.Tech in CSE(Data Science), Meerut Institute Of Engineering And Technology, CGPA: 7.72 2021 – 2025

Google × Kaggle — 5-Day AI Agents Intensive

Hands-on Vibe Coding certification: built AI agents that take actions, call tools, and handle multi-step tasks, with memory of past interactions, safety guardrails, and automated testing. Launched and monitored production AI apps using Google AI Studio (Gemini API).
